

SAMPLE REPORT — Verified Prospect Research

Independent Dental Practices · Austin, Texas, USA · 25 prospects · Researched 2026-10-23

What this is

A demonstration sample (not a commissioned order) of a verified prospect list built for a web/marketing agency client. Every practice was checked against its official website; the full spreadsheet (XLSX/CSV) carries the source URL and fit reason for every row. Emails and decision-makers appear only where the business publishes them — otherwise they are honestly marked 'Not publicly listed'. No data is guessed or pattern-filled.

QA summary

25 rows · 0 duplicates · 0 QA issues · public email on official site: 3/25 (12%) · named lead dentist/owner: 19/25 (76%) · confidence: 19 High, 6 Medium, 0 Low. Known gap: most dental practices do not publish an email — phone and website form are the realistic outreach channels, and four practices show phone conflicts between their site and directories (official-site values used).
