

SAMPLE REPORT — Verified Prospect Research

Plumbing Companies With No Website · Dallas, Texas, USA · 20 prospects · Researched 2026-10-24 · VeriProspect

What this is

A demonstration sample (not a commissioned order) of VeriProspect's core product: a verified list of local businesses that have NO website at all — the exact list a web design agency buys to pitch first websites. Every business passed a two-step check (its public listings show no website, and a name search found no official site); 51 candidates were rejected because a website existed, including builder subdomains and shared operator sites. The full spreadsheet (XLSX/CSV) records the no-website evidence, source URL and fit reason for every row.

QA summary

20 rows · 0 duplicates · 0 QA issues · public phone: 20/20 (100%) · public email on an authoritative source: 3/20 (15%) · named decision-maker: 4/20 (20%) · confidence: 2 High, 18 Medium, 0 Low. Known gaps, stated plainly: businesses without websites rarely publish an email, so phone is the real outreach channel for this list type; no-website status was verified from public listings (including mirrors of Google Business data) plus name searches — before any paid delivery we additionally spot-check the live Google profile. In-row flags disclose source conflicts (one listing marked 'Temporarily Closed'; one business based in a neighbouring city serving Dallas).

Company Name	Category	City/Area	Public Phone	Public Email	Decision Maker	Confidence
